

Philbert

Jakarta, Indonesia | philberttan72@gmail.com | <https://www.linkedin.com/in/philbert-tan> | <https://github.com/Philbert72>

Education

Bachelor of Computer Science (3.81/4.00 GPA) **2023 - Present**
Bina Nusantara University | Jakarta, Indonesia

- Majoring in Computer Science
- Exchange Program: National Sun Yat-sen University (NSYSU), Taiwan (Focus: Advanced Cryptography & Distributed Systems)

Professional Experience

MiniMemo | Jakarta, Indonesia **Sept 2025 - Dec 2025**
Chief Operating Officer

- Re-engineered photo-to-keychain workflows, reducing customer wait times by 40% and increasing hourly throughput by 25%.
- Standardized a 3-point QC protocol for printing and assembly, achieving a 90% satisfaction rate and cutting material waste by eliminating plastic packaging.
- Applying SMART objectives and financial metrics (NPV/IRR) to operations.

Volunteer

Teach for Indonesia | Jakarta, Indonesia **October 2025**

- Special Needs Education Facilitator (Volunteer) in SLBN 01, Heart From Heroes

Achievement

- Alibaba Cloud Certified Associate (ACA) Cloud Engineer Certificate - Alibaba Cloud **June 2025**
- Microsoft Azure AI Fundamentals Certificate (AI-900) - Microsoft **April 2025**

Technical Skills

-
- **Languages:** Python (Primary), PHP (Laravel), SQL, C, Java.
 - **AI & Data Science:** Graph Neural Networks (GNNs), NLP, Computer Vision, Non-negative Matrix Factorization (NMF), Statistical Modeling (Chi-Square).
 - **Cryptography & Security:** Bitcoin Protocol, ECDSA (Elliptic Curve Digital Signature Algorithm), Finite Field Arithmetic $GF(2^8)$, Cryptanalysis, Cloud Security.
 - **Tools & DevOps:** Git/GitHub, Docker, Linux (Ubuntu), PostgreSQL, MySQL, Alibaba Cloud, Microsoft Azure.

Publication

Graph Neural Networks for Cloud Security: Detecting Data Breaches in Real Time - IEEE (AiDAS) **2025**

Projects

HomeHeal – Health Management System | Laravel, PostgreSQL **April 2026**

- Engineered a full-stack web application for university assignments, implementing custom middleware for secure patient data handling and optimized SQL queries for medical records management.

Music Genre Classification using NMF | Python, Scikit-learn **January 2026**

- Applied Non-negative Matrix Factorization (NMF) for feature extraction from audio signals, improving classification accuracy by 15% through dimensionality reduction.
